

Grid Dimmers and Switches

LED 2-Way Push On / Off Rotary Dimmer 0 1-10 LEDs (1 Grid Space)

White 120W

V-PRO GRID

White 120W

Quicklink: Q494F

General

Colour White
Construction Plastic

Dimensions

Depth 24mm
Length 49mm
Width 26mm

Electrical

Maximum Wattage 120W
Voltage 240V

LED 2-Way Push On / Off Rotary Dimmer 0 1-10 LEDs (1 Grid Space) switch. Part of the MK Grid Plus System. Modules simply clip into place from the front of the mounting frame.

These dimmers incorporate the latest in microcontroller based circuitry to provide electronic soft-start and overload protection. They are radio frequency interference suppressed to BS EN 55015.

Suitable for use with tungsten filament lamps and for low voltage halogen lamps via good quality, dimmable, electronic or wire-wound transformers.
