|-----------------|--------|
| Input Voltage   | 12-24V |
| Maximum Wattage | 240W   |
| Minimum Wattage | 1W     |

The **Wise RGBW Scene** gives you all the colour change facilities of the standard Chameleon, with the inclusion of a fourth channel to work with red, green, blue and white fittings. This allows the ability to have colour change and warm or cool white using just one chameleon pack. It also gives a greater range of shades of colour including pastels to give a more subtle effect.

**Caution:** The warm white produced by RGB products is not the same as the warm white produced by single coloured products. By mixing the colours to create warm white a hint of Red, Green, or Blue may appear.
