

## GIP CLIP 24310

Grey Plastic  
Quicklink: Q49A4

### General

Colour	Grey
Construction	Plastic

The **Gip Mounting Bracket** is designed as a method of installing architectural profiles such as the GIP, GIZA, LIPOD. Made of plastic, the bracket is attached to the surface with the use of an appropriate screw. Mounting of the profile itself is done by clicking it into the bracket. Removing the fixture requires some excessive force, which prevents it from accidental detachment. Removing the profile can be done for example by levering the profile with a flat-blade screwdriver.

Designed for indoor applications, no resistance to UV radiation.
