

# Smooth

Smooth Spike Light 240V

Copper 35W

## ZT041-GU10 COP

Copper 35W

Quicklink: Q4A4F

### General

Cap	GU10
Colour	Copper
Construction	Copper
Dimmable	Yes
IP Rating	IP44

### Dimensions

Cable Length	1m
Head Diameter	63mm
Head Length	82mm
Height	282mm
Spike Length	200mm

### Electrical

Maximum Wattage	35W
Voltage	240V

The **Smooth Spike Light** is an IP44 rated fitting suitable for location in any soft ground. It is ideal for low level lighting of pathways, plants or ponds. It can be tilted so that the beam of light can be precisely controlled.

The head easily screws off for accessing the lamp. The length of the barrel allows this fitting to be used with halogen, compact fluorescent and LED lamps (available separately).

**Please note: that oxidation will give the copper fittings a weathered look over time. The positioning of the copper smooth fittings can also affect the speed of the oxidation process due to elements such as sunlight.**

### Lamp Options

- Halogen - Most popular lamp for use with this fitting. Produces a standard light source that is available in various beam angles. Can be dimmed.
- LED - Used as a direct replacement for halogen lamps. Produces a light source equivalent to a 35W halogen but requires only 5W, making it very energy efficient. Cannot be dimmed.
- Compact fluorescent (Switching) - Used as a direct replacement for halogen lamps. Produces a light source equivalent to a 50W halogen but requires only 11W, making it much more energy efficient whilst also being suitable where a higher output is needed (such as for flood lighting). Cannot be dimmed.
- Compact fluorescent (Dimming) - Produces a light source equivalent to a 50W halogen but requires only 11W, making it much more energy efficient whilst also being suitable where a higher output is needed (such as for flood lighting). Can also be dimmed, losing no functionality from a standard halogen lamp.
