

# Dimming and Scene

Wise Scene/Dimming Receiver  
24V 60W

---

## WISETRANS/REC 60

24V 60W

Quicklink: Q4A88

---

### General

Construction	Plastic
IP Rating	IP65

Maximum Scenes Per Receiver	64
Maximum Switches Per Receiver	16
Radio Frequency	868.3 MHz

### Dimensions

Height	20mm
Length	360mm
Width	30mm

### Electrical

Input Voltage	240V AC
Maximum Wattage	60W
Output Voltage	24V DC
Voltage	24V DC

The **Wise Trans/Rec 60** is a 60W 24V dimmer that is controlled by wireless switches. It can dim 24V DC LEDs. It can be programmed in 4 different ways using our wireless switches:

#### Option A - Scene Programming

Programming a 7 button switch gives you 4 scenes, master raise/lower and off. A scene is a preset level of light for each circuit in a room. For example, you can have 4 receivers in your living room. Pressing scene 1 on the 7 button switch could give the following;

Downlights = 100%  
Wall lights = 80%  
Pendant = Off  
Low level LEDs = 55%

Pressing scenes 2,3 and 4 can give other preset levels. Any level can be programmed to each receiver.

#### Option B - Dimming Programming

Programming a 1 button switch gives you on/off with a quick press and dimming up and down while holding the switch. When turning the lights on you can choose to always bring on the lights at 100% or the last dimmed level.

#### Option C - Switching ON only

Programming a 1 button switch gives you only ON. This function is used to program multiple circuits to ON.

#### Option D - Switching OFF only

Programming a 1 button switch gives you only OFF. This function is used to program multiple circuits to OFF.

A receiver is not limited to one of the programming options. E.g. you can program a switch for scene control, another switch for dimming and another switch for master ON/OFF.

#### Wireless Switches and Remotes

A 7 button switch must be used if you require scene setting, Option A. Any button switch can be used when programming options B,C and D. To view other switches click the links on the right of this page, for example Wireless ID switches.
