

3/2 LEDG95WD

5W 2200K - 3000K
Quicklink: Q4BE2

The LED G9 Capsule Lamp is designed as a direct retrofit replacement for halogen G9 lamps. It has a comparable light output and beam spread to its incandescent and halogen equivalents but is more energy efficient and has a far greater life span. The LED technology used in this lamp give it the comparable benefits of being entirely mercury free, producing little or no heat and having no ultraviolet or infra-red light in its output.

This lamp emits a warmer light as you dim, to create a more relaxing ambience. The effect known as Warm Dimming does not have anything to do with the actual heat or physical warmth of the bulb, it is when an LED bulb's colour temperature lowers when dimmed. The lower the brightness the warmer the colour. This is a natural replication since at sunset the sky appears more warm in colour, which puts our minds in a different gear and helps transition us to the night-time. Many incandescent and halogen bulbs naturally have this effect, yet are inefficient. When the Reality Atmosphere Lamps dim, they retain their high efficency, yet still produce the relaxing and comforting feel of an appealing "warmer" glow.

General

Cap	G9
Construction	Plastic
Dimmable	Yes

Dimensions

Height	57mm
Width	18mm

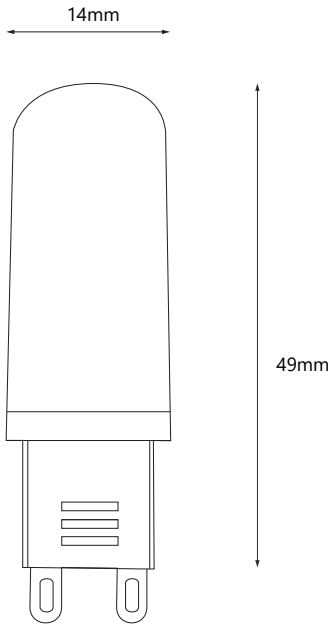

Electrical

Maximum Wattage	5W
Voltage	240V

Light Characteristics

Colour Rendering Index	90
Lumens	500 lm
Lumens Per Watt	100 lm/W
