

LED Double Sided Neon Flex 240V

LED Double Sided Neon Flex 240V (14.8mm)
3000K Warm White 1000mm / 9.2W

LEDNEONDS LK WRM

3000K Warm White 1000mm / 9.2W
Quicklink: Q4CF0

General

Construction	Plastic
Dimmable	No
IP Rating	IP67

Dimensions

Cable Length	1m
Height	8.2mm
Length	1m
Width	15mm

Electrical

Maximum Wattage	9.2W
Voltage	240V

Light Characteristics

Colour Temperature	3000K Warm White
Lumens	460 lm
Lumens Per Watt	50 lm/W

LED Neon Flex Double Sided emits a bright neon lighting effect that can be used for all kinds of applications. Neon flex mimics the traditional effect of glass neon, but is flexible and lit by LEDs making it much more energy efficient. The double sided neon flex is ideal for trim lighting for displays and creating neon signs, or for more domestic lighting uses such as under counter or shelf lighting in the kitchen and living room or even garden path lighting.

Available in warm or cool white, double sided neon flex can be bent into a variety of shapes, creating straight lines (1m extrusion is available - see linked products), sharp curves and lettering.

Please note : If the tube is cut into sections, we cannot refund.
