The **Contour Low Profile Downlight 12W & Driver** is a high powered LED downlight that provides a strong vibrant light. Its low profile makes it suitable for installing in rooms where ceiling depth is limited. It can be used as either the primary or secondary source of light. It can be tilted by 20 degrees to adjust the light direction. Ideal as a replacement for standard halogen lamp downlights which generally consume more power and produce more heat. Complies with part L building regulations.
