Innovative **Slim Duet** connecting system, a perfect combination between tracks and LED fixtures.

Not only emphasising on characteristics and rapid installation of the modules, it also creates simple and clean appearance.

Unique designed spotlights, panels and downlight modules are available for multitask lighting requirements to a room.

The Slim Duet track is recessed into the ceiling, plastering to the edge, for a trimless seamless finish. The LED fixture installation is designed to be simple and convenient, just plug and play, tools-free, giving significant savings on installation and maintenance.

The track cover can be moved or cut to fit with the LED fixture to make the overall appearance flawless.

Please Note: We recommend using DIMDRIV2 24V drivers

1. Max wattage linkable per loop for 24VDC is 150W.
2. Max length of track linkable per run is 10M, and the max cable length between driver and track is 2M.
3. To use drivers not on the recommended list, it requires compatibility test before installation.
