The Tin Maxi Up and Down and Sensor Pillar Light designer for Nordlux, is a contemporary and stylish exterior lighting solution, designed to add a touch of sophistication to your garden and outdoor space. Its sleek design and modern aesthetic make it an ideal choice for brightening up any wall or patio area. This Pillar Light features a motion sensor with a range of up to 8m. Ideal to install near the entrance of a building or near walkways to enhance the overall look of the property and provide safety for those walking near the area. Please not, these lights do not have an override function.

The versatile design of this wall light allows it to seamlessly blend into any décor style, from modern to traditional, and create a warm and inviting ambiance. The sleek lines and high-quality craftsmanship make this wall light a must-have for any discerning homeowner looking for a lighting solution that truly stands out.

This range of Tin Exterior Pillar Lights is available in different colours and sizes. An extensive range of products to choose the one that cover all your lighting needs.
