

LED Tape COB True Seamless 8mm

LED Tape True Seamless COB 5M 24V
50W Cool White 4000K

TAPECOB24 5M CW

50W Cool White 4000K
Quicklink: Q53CD

General

Construction	Plastic
IP Rating	IP20

Dimensions

Cut Length	55mm
Length	5m
Width	8mm

Electrical

Maximum Wattage	50W (5 x 10W)
Voltage	24V DC

Light Characteristics

Colour Rendering Index	90+
Colour Temperature	4000K Cool White
Lumens	6500 lm
Lumens Per Metre	1300 lm/m
Lumens Per Watt	130 lm/W
Watts Per Metre	10 W/m

LED Tape COB Seamless has no visible dots, producing our most seamless line of light yet.

LED Tape is a versatile light source with a wide range of uses that can be either decorative or functional. Easy to install with pre-fitted double-sided backing tape and can be cut to a specific length.

Anything from a short linear run of light for under cabinet or plinth lighting, shelving, or backlighting mirrors to large scale applications such as low-level lighting in corridors, dropped ceilings, cove lighting, doorways, handrails and staircases can be achieved. A wide range of extrusions and diffusers are available to suit any location and produce different effects. For example a continuous, seamless line of light can be created when mounted in Maxi extrusions combined with Liger diffusers.

LED Tape Totally Seamless is a high powered 10W per metre strip light powered by 24V. It carries an IP20 rating making it only suitable for indoor use.

The 5 metre LED tape is pre wired with a power cord, and cannot be joined to additional pieces to make longer lengths. This LED tape can be cut every 55mm. The maximum distance between the power supply and LED tape is 10 metres. We recommend extending using a 1.5mm² cable. The maximum total length is 15 metres for the LED tape and power supply combined.

This LED tape is dimmable and we recommend using the Triac LED Dimming Driver. Ensure the dimming driver you use exceeds the total wattage of the LED Tape.
