Colour Rendering Index	90
Colour Temperature	3000K Warm White
Lumens	900 lm
Lumens Per Metre	180 lm/m
Lumens Per Watt	19 lm/W
Watts Per Metre	9.6 W/m

LED Strip Flexible Tape Light is a versatile light source with a wide range of uses that can be either decorative or functional. Easy to install with pre-fitted double-sided backing tape and can be cut to a specific length.

Anything from a short linear run of light for under cabinet or plinth lighting, shelving or back lighting mirrors to large scale applications such as low level lighting in corridors, dropped ceilings, cove lighting, doorways, handrails and staircases can be achieved. A wide range of extrusions and diffusers are available to suit any location and produce different effects. For example a continuous, seamless line of light can be created when mounted in Maxi extrusions combined with Liger diffusers.
