Quicklink: Q5465

General

Colour	Stainless Steel
Construction	Steel

Dimensions

Depth	15mm
Length	2m
Width	65mm

The **Steel Cove Extrusion Profile H20** is able to be installed vertically or horizontally, making it suitable for a seamless integration within a wall, ceiling, or drywall installation.

This slimmer profile provides reduced separation between the LED tape and the surrounding ceiling or wall, resulting in a more defined and brighter lighting edge. Its shallow depth makes it ideal for minimalistic drop ceiling details or installations with limited space, while still delivering a clean and continuous linear lighting effect. The proximity of the LED to the opening creates a crisp highlight that enhances architectural lines with a more pronounced lighting effect.

Key Features

- Provides minimal separation, creating a sharper and brighter light line because the LED sits closer to the opening.
- slimmer aesthetic, more compact detail with a brighter visual edge.
- Produces a more direct lighting effect, accentuating architectural lines due to reduced recess depth.
