General

Colour White
Construction Plastic

Electrical

Voltage 240V

The **Euro Modules** are for standard euro grid configurations based on a single module measuring 25mm x 50mm(Double 50mm x 50mm). Mounting plates are available in a wide variety of finishes. Each Euro Module is fitted with twin earth terminals.

Divider plates can be installed as necessary in order to screen sensitive modules.

CAT 6 sockets and modules are wired using the T568B standard, which specifies the pinout order for the eight wires(The orange wires connect to pins 1 and 2, and the green wires connect to pins 3 and 6.) to ensure proper connectivity and performance.
