The **RGBW 5-in-1-LED Tape** is a super quality LED tape that includes 5 LED chips in a single tape and 60 high quality LEDs.

LED Tape is a versatile light source with a wide range of uses that can be either decorative or functional. Easy to install with pre-fitted double-sided backing tape and can be cut to a specific length.

Anything from a short linear run of light for under cabinet or plinth lighting, shelving or backlighting mirrors to large scale applications such as low-level lighting in corridors, dropped ceilings, cove lighting, doorways, handrails and staircases can be achieved. A wide range of extrusions and diffusers are available to suit any location and produce different effects. For example, a continuous, seamless line of light can be created when mounted in Maxi extrusions combined with Liger diffusers.

RGBWW 5-in-1-LED Tape is a high powered 24W per 5-metre strip light powered by 24V. It carries an IP67 rating making it suitable for outdoor use.

The tape includes RGB, pure white and warm white. The input voltage is DC24V
