The **Dimmable LED PAR38** is designed as a direct retrofit replacement for halogen PAR38 lamps. It has a comparable light output and beam spread to its incandescent and halogen equivalents (140W) but is up to 80% more energy efficient and has a far greater life span. The LED technology used in this lamp give it the comparable benefits of being entirely mercury free, producing little or no heat and having no ultraviolet or infra-red light in its output.
