

WISE MW2AIP67

White 500w

Quicklink: Q5793

General

Colour	White
IP Rating	IP67

Detection Angle	30° - 150°
Detection Range	12m X 6m
Time Delay	5sec (walk test), 30sec, 1min, 5min, 20min, 30min

Dimensions

Height	65mm
Length	110mm
Width	110mm

Electrical

Amperage	2A
Input Voltage	240
Maximum Wattage	500W
Voltage	240V

The **Wired Microwave Presence Detection Switch Kit 240V** is a **Wise Transmitter** with a wired **Microwave Presence Detection Switch**. The Wise Transmitter enables the Sensor to send wireless signals to any Wise Receiver. Ideal for when you cannot install any cables between your sensor and your lighting circuit.

The transmitter is small enough to be placed in many locations, for example, in the ceiling, in the wall either through it, behind a recessed light fitting or in a surfaced mounted fitting. The transmitter should be placed in a suitable insulated box.

It can be fitted into a small waterproof box to allow it to be used outside for your garden lighting, garage doors and water features.

The transmitters are designed to be simple to install, easy to use and most importantly, reliable.

Ideal for outdoor or indoor use the **2A Microwave Presence Detection Switch IP67** can be wall or ceiling mounted and are designed for the automatic switching of lighting, heating, and air conditioning loads.

The sensor detects movement, within its range of detection, by emitting low-power microwave signals and measuring the reflections as the signal reflects off moving objects such as people moving through a room.

When movement is detected the load switches ON. If no more movement is detected within a certain time, then the MW2A IP67 will switch the load OFF. The time can be set via the internal dip switches.
