

Heat Shrink

Heat Shrink Tubing 18mm to 6mm (3:1 Ratio)
Clear 3000mm

HEATSHRINK18 CLR

Clear 3000mm
Quicklink: Q5850

General

Colour	Clear
Construction	Rubber

Dimensions

Length	3m
Width	18mm

Upgrade your cable management with this high-performance 18mm clear heat shrink tubing. Featuring a powerful 3:1 shrink ratio, it compresses down to 6mm when heat is applied, making it ideal for shielding irregular shapes, large joints, and transitions.

Because it's completely transparent, you can easily read wire labels and inspect internal connections long after installation. Crafted from durable, flexible polyolefin, this 3-meter sleeve provides excellent electrical insulation and superior resistance to abrasion, moisture, and fluids. Perfect for automotive, industrial, or home electronics projects requiring heavy-duty component protection and clean wire bundling
