Made of natural gypsum, our **Plaster Wall Lights** will add an elegant and modern touch to your home as a secondary lighting source. With a seamless and linear design and neutral white coloured, this interior wall light can be painted any desired colour to match any home décor and colour scheme.

Our wall lights provide long-lasting service, the lamp body does not rust, no oxidation. Easy to wire and install, the electric part of the light source and the lamp body is designed in a separate structure to facilitate maintenance and replacement.

It requires 2xG9 lamps which are sold separately.

Please note: These light fittings are made from real plaster. Due to the nature of the manufacturing process, there may be slight variations and minor imperfections in each piece. This is a normal characteristic of the material and adds to its unique appearance.
