The **Guide 101** is an IP68 rated uplighter. Economical mini light LED for visual signalling. To be used for pedestrian walk ways or wall fixed. Passable traffic only at low speed, and will bear a static load up to 1000kg, if uniformly stationed. It has an aluminium and clear glass surface. It is available in 5 colours.

Two transformers can be used with this product. If you choose to run this fitting indoors, our **AL20M** transformer should be sufficient, this can power up to 80 units. Outside, the **WP52** transformer should be used. This will power up to 200 units.
