Bring your space to life with the **ICON Spotlight Track Light** — a sleek and modern GU10 LED track fitting designed for 240V Three-Circuit systems. Perfect for highlighting artwork, displays, or architectural features, this spotlight delivers focused, high-quality illumination with a clean, contemporary look. Ideal for retail, galleries, and stylish interiors.

The fittings are positioned onto the three circuit track which can be mounted onto practically any surface. This allows you to move and change your light fittings around when you need to, without having to make any long term installations.

Three circuit track lighting is a versatile and flexible lighting system commonly used in commercial and residential spaces. The singularity of this lighting track system is that each of the three circuits can be wired and controlled independently, allowing you to have different lighting configurations in the same space. This means you can have multiple sets of lights on the same track, each set with its own switch or dimmer control.

Please note: The Icon range comes with a removable Honeycomb Baffle
