General

Colour	Black
Construction	Plastic
IP Rating	IP67

Dimensions

Height	53mm
Length	85mm
Width	85mm

Debox 11 is a versatile surface-mounted internal and external junction box that offers reliable cable management for a range of applications. It comes with 10 soft membrane-covered cable entries, which provide quick puncture-entry and self-sealing properties that are rated to IP66.

Eight of the entries are threaded M20, making them ideal for cable glands, with no need for an internal locknut. This provides a higher protection rating of IP67, ensuring that your cables are safe and secure in any environment. To further simplify installation, **it comes with 5(3 x pole) screwless connectors**.

It can be easily fixed into a built-in mounting fixture, making it a convenient and flexible solution for a range of applications. The housing is made with flame-retardant, impact-resistant polypropylene, ensuring that it can withstand even the harshest conditions.

Key Features

- Ready for use, complete with 5 x (3-Way) screwless connectors
- 4 Mounted Screw Holes
- P66 rated using membrane cable entries
- IP67 rated using threaded, M20 cable gland entries
- Max Current: 32A
- Temperature Rating -30°C - 100°C
