Voltage	240V

The Fixed GU10 Downlight is designed for residential and commercial applications that require discrete, low glare lighting. With its fire-rated construction, this downlight ensures ultimate protection while illuminating any space with precision and efficiency. Available in both fixed (IP65 rating) and adjustable options, it meets a great variety of lighting needs.

The trim measures approximately 7mm, and its slightly curved design, along with the included honeycomb, reduces glare and controls light spread. This is particularly beneficial in environments where direct, uncontrolled light might be too harsh as the inward curving design adds depth and dimension to any room.

The IP65 rating, ensuring robust protection against both dust and water ingress making the Nano Fixed Downlight an excellent choice for your bathroom lighting design, combining sleek aesthetics with durable performance.

The Fixed Downlight features a unique concave design that add a modern, special touch, offering a visually interesting alternative to traditional flat downlights, perfect for enhancing any space.
