Colour Temperature 2700K Warm White

Lumens 12000 lm

Lumens Per Metre 1200 lm/m

Lumens Per Watt 120 lm/W

Watts Per Metre 10 W/m

LED Tape COB Seamless has no visible dots, producing our most seamless line of light yet.

LED Tape is a versatile light source with a wide range of uses that can be either decorative or functional. Easy to install with pre-fitted double-sided backing tape and can be cut to a specific length.

Anything from a short linear run of light for under cabinet or plinth lighting, shelving, or backlighting mirrors to large scale applications such as low-level lighting in corridors, dropped ceilings, cove lighting, doorways, handrails and staircases can be achieved. A wide range of extrusions and diffusers are available to suit any location and produce different effects. For example a continuous, seamless line of light can be created when mounted in Maxi extrusions combined with Liger diffusers.

LED Tape Totally Seamless is a high powered 10W per metre strip light powered by 24V. It carries an IP20 rating making it only suitable for indoor use.

The 5 metre LED tape is pre wired with a power cord, and cannot be joined to additional pieces to make longer lengths. This LED tape can be cut every 55mm. The maximum distance between the power supply and LED tape is 10 metres. We recommend extending using a 1.5mm² cable. The maximum total length is 15 metres for the LED tape and power supply combined.

This LED tape is dimmable and we recommend using the Triac LED Dimming Driver. Ensure the dimming driver you use exceeds the total wattage of the LED Tape.
