Diameter
Fibre Optic Length 25x4, 2,3,4,5 metres
Light Engine Height 40mm
Light Engine Length 140mm
Light Engine Width 90mm

Electrical

Maximum Wattage 16W
Voltage 240V

The **100 point RGB fibre optic kit** with 25x4 variable length fibres, 2, 3, 4 and 5 metres each with a diameter of 0.75mm allowing the creation of star effects on ceilings and walls. Controlled by a LED light engine with in built in transformer and mains pluggable cable.

Controllable by the included **IR RGB remote**, the fibre optics can produce a 16 static dimmable colours but can also be set to **flash, fade or strobe** between each colour at variable speeds.

Installation of Light Engine:

The Light Engine should be installed in a dry area with good ventilation.
