Dimensions

Cut Length	100mm
Length	8800mm
Width	13mm

Electrical

Maximum Wattage	123W (8.8 x 14W)
Voltage	24V

Light Characteristics

Colour Temperature	3000K Warm White
Watts Per Metre	14 W/m

LED Strip Flexible Tape Light RGBW is a versatile light source with a wide range of uses that can be either decorative or functional. Easy to install with 3M 300 strong adhesive tape on the backside of the tape and can be cut to a specific length.

Anything from a short linear run of light for under cabinet or plinth lighting, shelving or back lighting mirrors to large scale applications such as low level lighting in corridors, dropped ceilings, cove lighting, doorways, handrails and staircases can be achieved. A wide range of extrusions and diffusers are available to suit any location and produce different effects. For example a continuous, seamless line of light can be created when mounted in Maxi extrusions combined with Liger diffusers. With an IP67, the tape is ideal for outdoor use or in bathrooms.

LED tape power cord included and is approx. 200mm long.
