

Screwless Brushed Stainless

LED Dimmer Trailing Edge Switch Screwless

100W 4 gang 2 way Brushed Stainless

SCSSDSW4 LED

100W 4 gang 2 way Brushed Stainless
Quicklink: Q6B9C

General

Colour	Stainless Steel
Construction	Steel

Dimensions

Height	86mm
Length	146mm
Plate Depth	5mm

Electrical

Maximum Wattage	100W
Voltage	240V

The unique **Screwless** range consists of a 5mm clip-on front plate, which offers a stunning finish with no screws. The clip-on plate makes decorating easy. Simply remove the front plate before decorating and then replace afterwards.

The Trailing Edge Dimmer Module is designed for use with trailing edge electronic low voltage transformers. Using trailing edge technology this module has many advantages over conventional (leading edge) dimmers.

- Lower power losses in the dimmer
 - Virtually no electromagnetic interference
 - Quiet in operation
 - Soft start
 - Overcurrent and short circuit shut down
 - 10-250W INC./HAL
 - 2-100W LEDs
-
