

TAPECOB QLCNBTC5

Clear 5 mm
Quicklink: Q6CCA

General

Colour	Clear
Construction	Plastic
IP Rating	IP20

Dimensions

Cable Length	140mm
--------------	-------

Effortlessly power your 5mm COB LED tape lights with this **2-pin strip-to-power connector**. Designed for fast, solder-free installation, this connector allows you to link your LED strip directly to a power source using pre-attached wires. It's ideal for single-colour COB LED strips and ensures a stable, long-lasting connection.

The clear housing provides a clean look while allowing light to pass through with minimal interference. Its compact design makes it easy to integrate into tight spaces without compromising performance.

To install, align the connector with the cut point on your LED strip and insert the strip fully into the connector body, ensuring the copper pads match the internal pins. Press the connector closed until it clicks securely into place. Then, connect the red and black wires to your power supply.
