

## **GVASGP50ANT CLS**

Anthracite 5 Channel  
Quicklink: Q6D5C

### **General**

Colour                      Black

Geneva brings the flexibility of Mode systems to the custom integration and European markets. Designed to suit standard UK and European back boxes the Geneva plate has a design tailored to the AV and integration markets in the UK and across Europe.

Clear lines, laser engravable buttons and a variety of standard and custom finishes make Geneva a very popular choice for lighting control.

Buttons can be programmed to recall a scene, toggle a scene ON and OFF, RAISE or LOWER lighting levels, control blinds.

Geneva is just one of a range of keypads and user interfaces available from Mode Lighting which have been designed to offer the user a wide selection of finishes, button styles, layouts and overall styling.

All keypads connect using the M-BUS network and systems can be controlled to allow any button to control any single group or groups of lighting as required.
