Coolbrium is a smart phone inspired touch sensitive keypad with up to eight programmable buttons which can be configured to control lights in any format desired. Available with a bespoke Black or White glass fascia as standard the touch buttons can be engraved to suit individual applications.

Buttons can be programmed to recall a scene, toggle a scene ON and OFF, RAISE or LOWER lighting levels, control blinds.

Coolbrium is just one of a range of keypads and user interfaces available from Mode Lighting which have been designed to offer the user a wide selection of finishes, button styles, layouts and overall styling.

All keypads connect using the M-BUS network and systems can be controlled to allow any button to control any single group or groups of lighting as required.

Key features
