

Micro LED Extrusion Profile - Cabinet and Cove

Micro 30° Recessed LED Tape Extrusion Profile
Anodised Aluminium 2000mm

MICRO30 K ANO 2M

Anodised Aluminium 2000mm
Quicklink: Q6DD2

General

Colour	Aluminium
Construction	Anodised Aluminium
IP Rating	IP20

Dimensions

Length	2m
Minimum Depth	11.2mm
Width	20.3mm

Light Characteristics

Beam Angle	30°
------------	-----

The MICRO-30° profile is a compact aluminum extrusion designed for LED strip lighting, offering a precise 30° angled light output. Ideal for furniture, under-cabinet, and decorative applications, this profile ensures a sleek, modern finish while improving heat dissipation and LED longevity.

Features:

- Lighting Angle: 30° for directional illumination
- Material: High-quality aluminum for durability and heat management
- Mounting: Recessed installation using adhesive or double-sided tape
- Applications: Furniture lighting, under-cabinet lighting, decorative accents
- Finish Options: Silver anodized, silver non-anodized, white lacquered, black anodized
- Lengths Available: 1000 mm, 2005 mm, 3010 mm

Technical Specifications:

- Width: 20.3 mm
- Height: 11.2 mm
- LED Strip Width: Up to 8 mm
- Profile Shape: Angled

Typical Uses:

Dedicated for installation in furniture boards and built-in structures. Kitchens, bathrooms, display units, media rooms, and commercial interiors
