Dimensions

Base Width	70mm
Height	110mm
Shade Diameter	28mm
Shade Length	178mm

Electrical

Maximum Wattage	80W (2 x 40W)
Voltage	240V

The Carme 240V mono wire system fitting is constructed from metal alloy, polycarbonate and sandblasted Pyrex glass.

This fitting requires two other products, **240V Double Mains Cable** and a **Fixing Kit with Wall Mains Supply**. The cable provides both power and suspension. The fixing kit includes tensioners and fixings to ensure the cable is taut and provides full support to the fitting. A mains supply box is included with the fixing kit to provide interface between your mains supply and the cable system.

A maximum 1000W of fittings can be added to the cable. Additional accessories are available that allow customisation of your system for the requirements of the room in which it is being installed.

This fitting is rated IP40 and takes two 40W G9 capsule lamps (available separately).
