Width	45mm

The CX215 Ledge is the most versatile L-shaped model to date: a cornice, curtain profile and light source all in one. Elegant, lightweight and quickly installed - Ledge is a subtle powerhouse for those who love sleek and smart design.

With the Ledge Range, Orac presents a trio of curtain profiles whose refined proportions and subtle presence bring a new harmony to the room - a study in elegance and possibility.

The Ledge profiles are highly versatile and can be used in various ways - as curtain or LED profiles, to hide curtain rails, or as support cornices to glue other profiles on top. They are also ideal for concealing pipes, tubes, or other less attractive elements in a room. Always consider the desired end result before installation and prepare carefully by checking the installation instructions.

Please note: the maximum contact temperature for Orac profiles is 65 °C (149 °F)
