Micro Plus Power End Cap
Black

MICRO PL PWR BLK

Black
Quicklink: Q6EE5

General

Colour	Black
Construction	Plastic

Dimensions

Depth	6mm
Width	12mm

The **Micro Plus Power End** is used in conjunction with the *Mirco Plus Extrusions*.

Its purpose is to seal up the starting end of the extrusion, whilst leaving a small hole to allow a cable to be inserted through to the first piece of LED Tape. This is to ensure small objects such as dust cannot enter the fitting to interfere with the electrical components inside.

Only 1 power end is required for each circuit of LED Tape. This means that if you buy 2 x 2m of extrusion, you would only need a power end on the final piece.
