General

Colour Black

Dimensions

Depth 6mm
Width 16mm

The **Micro Plus Surface Endcap** is used in conjunction with the *Micro Plus Surface Extrusions* for an Aesthetic finish and protection of the interior of the lighting fixture.

Its purpose is to seal up the furthest end of the extrusion to ensure small objects such as dust cannot enter the fitting to interfere with the electrical components inside.

Only 1 endcap is required for each circuit of LED Tape. This means that if you buy 2 x 2m of extrusion, you would only need an endcap on the final piece.
