Construction

Plastic

Easily connect your 10mm COB LED tape with this **T-shaped 2-pin connector**, designed for quick, secure, solder-free installation. Ideal for creating multi-directional layouts, it allows you to split your LED strips cleanly without bending or damage. Please note that once installed, removing the connector may damage the LED strip.

The compact, clear design ensures a neat finish while allowing light to pass through with minimal obstruction. Simply insert the strips, align with the cut points, and clip firmly into place for a reliable connection.
