The Wiska EV201D 6-8mm Pre Filled Branch Gel Joint 450v with Screw Terminal is a reliable and durable solution for outdoor electrical connections. Designed for ease of installation and long-lasting performance, this pre-filled gel joint offers secure and waterproof connections for cables with diameters ranging from Ø 6mm to 8mm.

Designed with an EVO-Branch configuration, this waterproof gel joint has an IP68 rating (up to a depth of 1 metres)

The pre-filled gel creates a dependable barrier that insulates your connections while blocking out moisture, dust, and environmental debris. Featuring a non-toxic formula with an indefinite shelf life, it is completely safe and ready for immediate use.
