General

Colour Chocolate Bronze

Horizon Square Latching Toggle Switch features three fixed positions: **ON-OFF-ON** (up, centre, and down). The switch remains in the selected position until manually changed, providing reliable and precise control for a wide range of electrical applications.

Ideal for switching between two power sources or controlling devices that require directional operation, such as **motorised blinds, curtains, shutters, and other reversible motors**. The centre OFF position allows you to stop operation at any time, offering enhanced control and safety.
