## TAPE600 10M 3K

96W (9.6W/m) 3000K Warm White  
Quicklink: Q6F7E

### General

Construction Plastic  
IP Rating IP68

LED Chip SMD 3528  
LED per Tape 600

### Dimensions

Cut Length 50mm  
Height 4mm  
Length 10m  
Width 10.42mm

### Electrical

Maximum Wattage 96W (10 x 9.6W)  
Voltage 24V DC

### Light Characteristics

Beam Angle 120°  
Colour Temperature 3000K Warm White  
Lumens 3800 lm  
Lumens Per Metre 380 lm/m  
Lumens Per Watt 40 lm/W  
Watts Per Metre 9.6 W/m

LED Strip Flexible Tape is a versatile light source with a wide range of uses that can be either decorative or functional. Easy to install with pre-fitted double-sided backing tape and can be cut to a specific length.

Anything from a short linear run of light for under cabinet or plinth lighting, shelving or back lighting mirrors to large scale applications such as low level lighting in corridors, dropped ceilings, cove lighting, doorways, handrails and staircases can be achieved. A wide range of extrusions and diffusers are available to suit any location and produce different effects.

This LED tape also has a cut mark every 50mm, meaning you can achieve more precise lengths for your installation. We recommend using 1.5mm<sup>2</sup> cable. The maximum total length is 20 meters for the LED tape and power supply combined.

This LED tape is dimmable and we recommend using the Triac LED Dimming Driver. Ensure the dimming driver you use exceeds the total wattage of the LED Tape.

**Please Note:** A power cord is included with this product.
