Cable Length	7300mm
Length	4700mm

Electrical

Maximum Wattage	8W (4 x 2W)
Voltage	240V

Light Characteristics

Colour Temperature	2400K Warm White
Lumens	720 lm
Lumens Per Watt	90 lm/W

Four light points that accompany the space with a balanced, natural luminous presence. Marina4 Cherry with sand white Cord finish is the pendant lamp designed to enhance outdoor settings such as terraces, pergolas, gardens, and balconies with a soft, welcoming light. The composition creates visual continuity and helps make the space more harmonious and relaxing in the evening hours.

The large-format lampshades, inspired by nautical buoys and featuring soft, organic shapes, enhance the decorative character of the pendant light and improve light distribution. The sand-white cable finish pairs naturally with light surfaces, neutral fabrics, and textured materials, blending seamlessly into contemporary or Mediterranean outdoor settings.

Designed for outdoor use, Marina4 Cherry integrates a waterproof structure with an IP67 protection rating against rain, dust, and humidity. The fixing rings at the ends make positioning the composition easier, while the included Plug allows for practical, immediate installation.

Specifications

- PVC Cord with 6 mm diameter, UV-resistant
- Lampshades with UV-resistant coating, width 163 mm, height 198 mm
