The Niglon WPB4RS IP55 Weatherproof Power Box combines a durable weatherproof enclosure with a convenient 4-gang 5-metre trailing socket, providing a practical all-in-one power distribution solution for outdoor and industrial environments. Constructed from UV-stable, impact-resistant materials, it offers reliable protection against dust and water ingress while keeping multiple power connections secure. Designed for use in gardens, workshops, building sites and temporary installations, the enclosure includes multiple cable entry points and optional wall-mounting locations for versatile setup. Compliant with BS1363 and BS1361 standards, the WPB4RS is a dependable choice for safely extending power where it is needed most.
