Protect your electrical connections in demanding environments with the **Niglon WPB4 IP55 Weatherproof Power Box**. Manufactured from high-impact, UV-stable material, this robust enclosure is designed to safeguard plugs, connectors and extension leads from dust, moisture and outdoor weather conditions. Featuring multiple cable entry points and convenient knockouts for easy installation, it is ideal for temporary power applications, garden equipment, construction sites, events and workshops. The IP55-rated design helps maintain reliable power connections indoors and outdoors, while optional wall-mounting points offer added installation flexibility. Backed by a 10-year warranty, the WPB4 delivers long-lasting protection and durability.
