Voltage	240V

The Dome GU10 Spotlight is a track light suitable for residential and commercial use. Our Reality GU10 / AR70 LED compliments this fitting.

Three circuit track lighting is a versatile and flexible lighting system commonly used in commercial and residential spaces. The singularity of this lighting track system is that each of the three circuits can be wired and controlled independently, allowing you to have different lighting configurations in the same space. This means you can have multiple sets of lights on the same track, each set with its own switch or dimmer control.
