General

Colour	Polished Brass

The superior quality of the **Horizon faceplate style** in antique bronze has been designed to suit both traditional and contemporary interiors. Produced with square corners, it features trimless switches for exceptional product reliability. To ensure design uniformity throughout a project, non-standard accessories can be made to suit requirements.

The Horizon Square Dolly Switch Module 2-Way Retractive (spring return) is designed for use with smart home systems, inline dimmers, and advanced lighting control networks. It automatically returns to the centre OFF position when released, providing precise and intuitive control.

How it Works

The switch features a centre-OFF design with momentary operation in both directions. Press and hold the toggle upwards to increase brightness, or downwards to dim the lights. A quick tap can also be used to switch compatible lighting systems on or off, depending on the connected control device.

Requires a standard 35mm or 47mm wall box and a compatible external dimming or lighting control system.
