

PIKO-45 POWER BL

Black

Quicklink: Q6FF6

General

Colour	Black
Construction	Plastic

The **Piko-45 Power Endcap** is used in conjunction with the *Piko Surface Extrusions*.

Its purpose is to seal up the starting end of the extrusion, whilst leaving a small hole to allow a cable to be inserted through to the first piece of tapelight. This is to ensure small objects such as dust cannot enter the fitting to interfere with the electrical components inside.

Only 1 endcap is required for each circuit of Tapelight. This means that if you buy 2 x 2m of extrusion, you would only need an endcap on the final piece.
