The **Invisible Round Adjustable Snoot** is a fire-rated downlight with an adjustable snoot head. It has an unobtrusive one millimetre plate that sits practically flush to the ceiling when fitted to blend seamlessly into its surroundings.

The snoot head prevents glare and directs a focused and controlled narrow beam of light. Perfect for shop lighting or displaying artwork.

Please note: the ceiling depth for this downlight depends on the lamp choice. For a standard halogen GU10 lamp the depth is 85mm. For a LED GU10 lamp a ceiling depth of 115mm should be allowed.

The Invisible range has been designed to be overpainted in the ceiling if necessary. The fittings colour code is painter RAL9010 - 30% Gloss level which has a slightly matt surface which the emulsion or other paints will adhere to, the slightly matt finish on the product will allow it to be carefully repainted to suit any other ceiling coloursThe finish from the factory is good enough for normal use and will blend in with most common ceiling finishes.
