Renaissance Shaver Socket

1 Gang Ochre Brass

RENOCSH1

1 Gang Ochre Brass
Quicklink: Q705F

General

Colour	Ochre Brass

Electrical

Voltage	240V

Renaissance is an exceptional **low profile solid brass flat screwless plate** with square corners. A design-first product with luxurious solidity and distinctive finish detail.

Imagined in-house, the Renaissance product design is led by sustainable processes from start to finish. An evolution of a classic product, the Renaissance screwless flat faceplate style champions modernity influenced by the traditional.

Made to last from highest quality solid brass, featuring square corners, precise lines and uninterrupted minimalist design, our **Renaissance flat faceplate is 2.5mm** in depth yet when installed is the slimmest profile screwless solution on the high-end market. Offering durability, this is achieved by a pocketed design and cleverly conceived hidden fixings on the rear of the plate for the flushest electrical installation.

Inspired by yellow ochre, an ancient naturally occurring blend of clay and limonite from the family of earth pigments and a staple of an artist's palette, electrical accessories in our Ochre finish with its brushed muted gold appearance will enrich sumptuous textures and emphasise the finishes of decorative brassware and metal fixtures.
