Colour	White
Construction	Plastic
IP Rating	IP00

Dimensions

Cable Length	2m
Depth	25mm
Diameter	70mm

Electrical

Maximum Wattage	300W
Voltage	240V

The **Solina Lamp Dimmer** is a discreet fitting that allows you to set the level of light for floor and table lamps. You don't need to do any new wiring, just plug it into the existing socket that your floor or table lamp uses. Your fitting then plugs into the additional socket supplied by the **Solina**.

LED's on the fitting indicate the current light level. It also intelligently memorises the last light level set, this will be apparent when you turn the dimmer on after power off. One tap on the dimmer brings on the last light level, while two taps softly fades the light on.

Only for use for floor and table lamps that do not contain integral dimmers. The dimmer cord is rolled inside the fitting reducing unsightly trailing wires. The maximum cord length is 2 metres.
