Dimensions

Base Width	70mm
Height	1350mm
Shade Diameter	200mm
Shade Length	200mm

Electrical

Maximum Wattage	100W
Voltage	240V

The **Elux 240V** mono wire system fitting is constructed from metal alloy and polycarbonate with the dome-shaped shade made from etched glass.

This fitting requires two other products, **240V Double Mains Cable** and a **Fixing Kit with Wall Mains Supply**. The cable provides both power and suspension. The fixing kit includes tensioners and fixings to ensure the cable is taut and provides full support to the fitting. A mains supply box is included with the fixing kit to provide interface between your mains supply and the cable system.

A maximum **1000W** of fittings can be added to the cable. Additional accessories are available that allow customisation of your system for the requirements of the room in which it is being installed.
