Tilt Warm/Cool 350mA
6W White

SPEC DL6WA WHITE

6W White
Quicklink: Q1614

General

Colour	White
Construction	Aluminium
IP Rating	IP54

Controller Output	350mA
Fitting IP Rating	IP54

Dimensions

Cut Out	100mm (Diameter)
Diameter	130mm

Electrical

Amperage	350mA
Maximum Wattage	6W

The Tilt is a recessed downlight which has a slight central rotation for directing beams of light. It has 6 high powered 1W LEDs (2 cool white, 2 warm white and 2 amber), and is popular in homes amongst residents wishing to achieve mood lighting.

When used in conjunction with the Wise Chameleon, the Tilts LED technology can create a scrolling colour temperature ranging from cool white to amber and back again.

The minimum needed to create the Tilts colour temperature effect is 1 LED driver (PTDCC4024VB recommended) for each Chameleon pack (WISE RGB MASTER) used, a Tilt Colour Temp light fitting, and a 7 button wall switch (WISEDSW7) to operate everything. (An infinite amount of Chameleon receivers can be operated through 1 wallswitch.) Up to 3 of the 6W Tilts can be put on 1 Chameleon pack.
